Description : Description du produit Veteran explorer Sir Ernest Shackletons excruciating and inspiring expedition to Antarctica aboard the Endurance has long captured the public imagination. South is his own first-hand account of this epic adventure. As war clouds darkened over Europe in 1914, a party led by Shackleton set out to make the first crossing of the entire Antarctic continent via the Pole. But their initial optimism was short-lived as ice floes closed around their ship, gradually crushing it and marooning twenty-eight men on the polar ice. Alone in the worlds most unforgiving environment, Shackleton and his team began a brutal quest for survival. And as the story of their journey across treacherous seas and a wilderness of glaciers and snow fields unfolds, the scale of their courage and heroism becomes movingly clear.

Prsentation de l'diteurThis book was converted from its physical edition to the digital format by a community of volunteers. You may find it for free on the web. Purchase of the Kindle edition includes wireless delivery..comSoon after the Norwegian explorer Roald Amundsen reached the South Pole in 1911, his Anglo-Irish rival, Sir Ernest Shackleton, sought to top the feat by making his way from one end of Antarctica to the other on sledge. He set off with a crew of 28, including scientists and a movie cameraman, but the voyage turned disastrous when Shackleton's ship, the Endurance, became hopelessly stuck in pack ice, throwing the men (and the dogs brought to pull the sledges) into a desperate battle for survival. South is Shackleton's own account--one of the critical sources for Alfred Lansing's bestseller Endurance--of what it was like to be "helpless intruders in a strange world," a vivid narrative in which tales of Edwardian pluck are counterpointed with lyrical accounts of whales, penguins, and bizarre mirages. This story of a group of men who beat nearly impossible odds to escape death and make their way home is one of the all-time great survival stories. --Robert McNamara From AudioFileOne might expect this story told by a Victorian explorer about his own exploits in Antarctica to be a little tedious. To the contrary, it's filled with fascinating developments and details and doesn't shrink from the stark realities of the story, as evidenced by the description of shooting and eating the sled dogs to prevent their and the humans' starvation. Sir Ernest Shackleton writes mostly in the first person. The audio publisher uses a "different acoustic" (a hollow and reverberant sound) for quotes and letters from others, which is an interesting, but disconcerting, technique. However, Barnett's reading remains at all times sober, straightforward and undramatic, as befits the seriousness of the subject. J.D.N. (c)AudioFile, Portland, Maine
